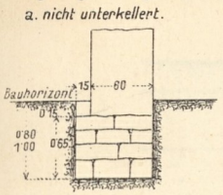
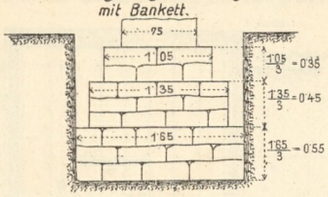
# Fundierungen.

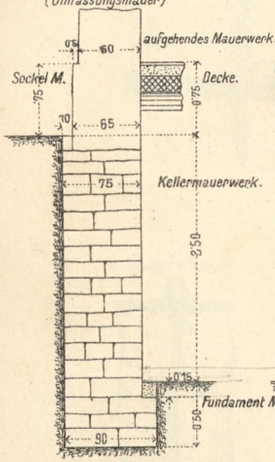
1. Tragfähiger Baugrund.
a. nicht unterkellert.



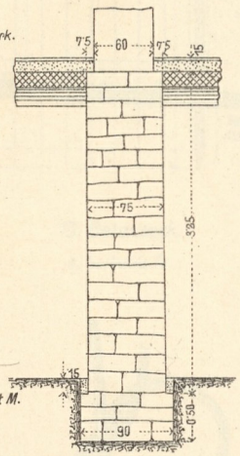
2. Fundierung auf gleichmäßigem Boden mit Bankett.



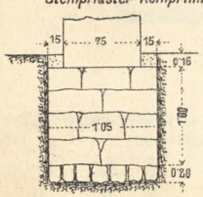
b. mit Kellergeschoß (Umfassungsmauer)



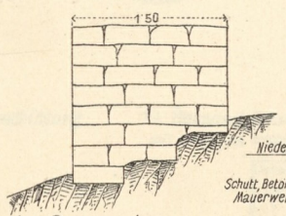
c. Mittelmauer.



3. Lehmboden durch eingerammtes Steinpflaster komprimiert.

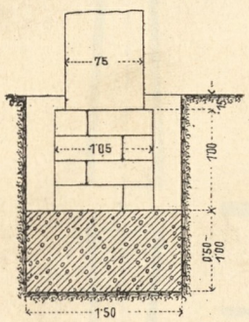


4. Fester Felsen.

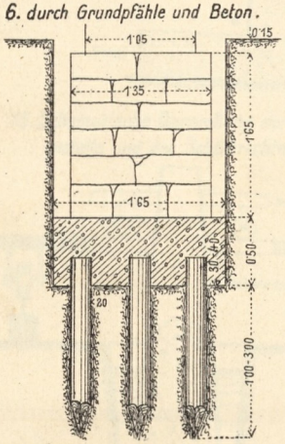


Verstärken des Baugrundes.

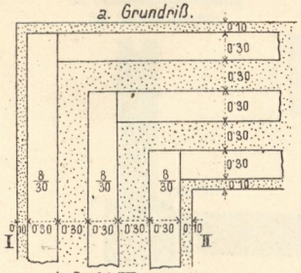
5. durch Betonbettung.



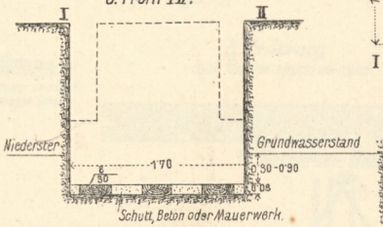
6. durch Grundpfähle und Beton.



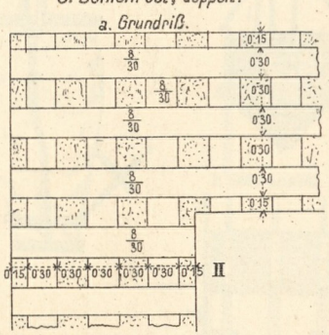
7. Bohlenrost, einfach.
a. Grundriß.



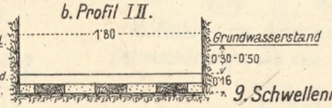
b. Profil III.



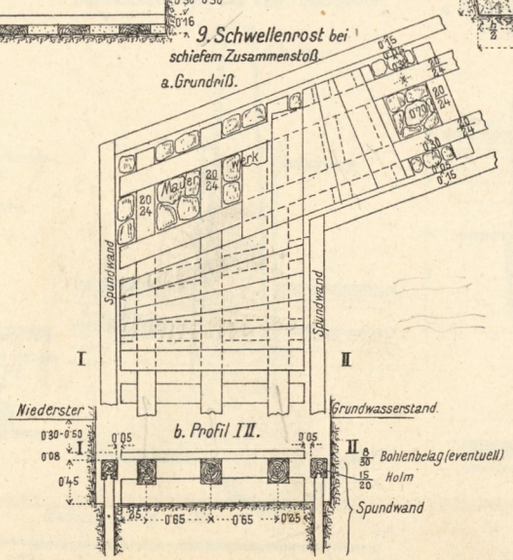
8. Bohlenrost, doppelt.
a. Grundriß.



b. Profil III.

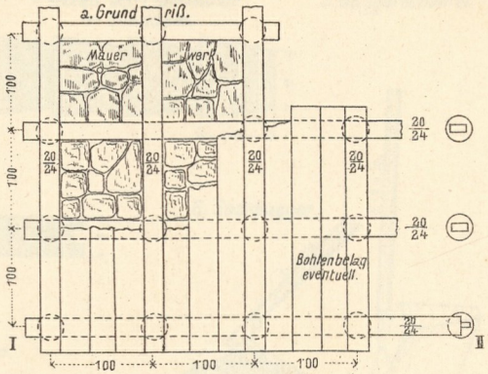


9. Schwellenrost bei schiefem Zusammenstoß.
a. Grundriß.

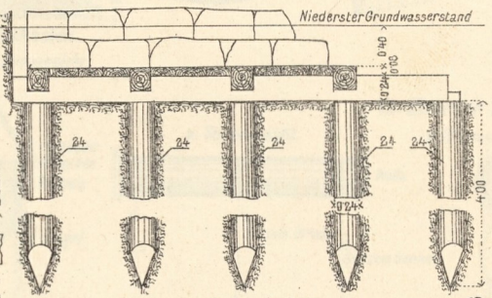


b. Profil III.

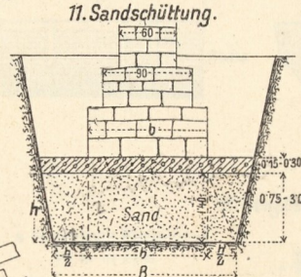
10. Pfahl- oder Pilotenrost.
a. Grundriß.



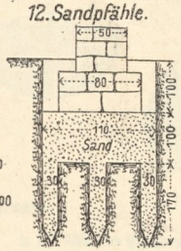
b. Profil III.



11. Sandschüttung.

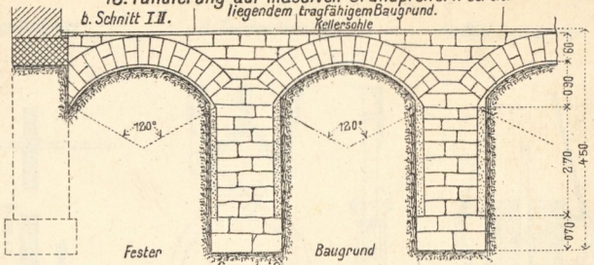


12. Sandpfähle.



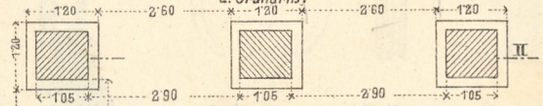
Betonpfähle System Strauß.

13. Fundierung auf massiven Grundpfeilern bei tief liegendem tragfähigem Baugrund.
b. Schnitt II.

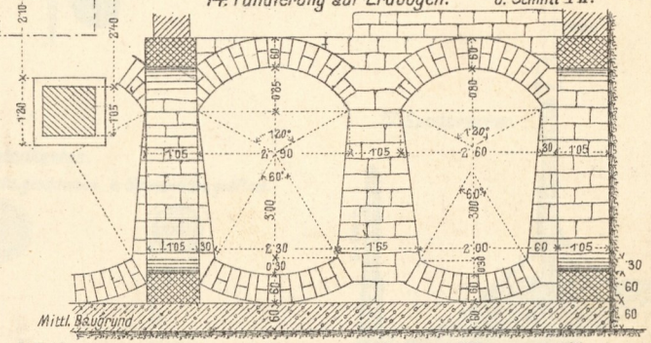


Fester Baugrund

a. Grundriß.

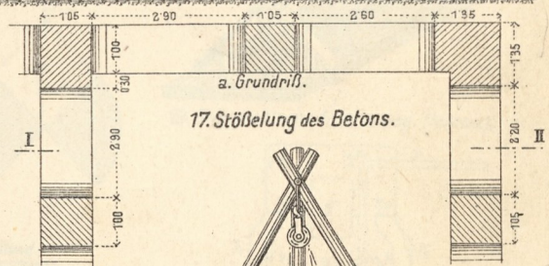


14. Fundierung auf Erdbögen.
b. Schnitt II.

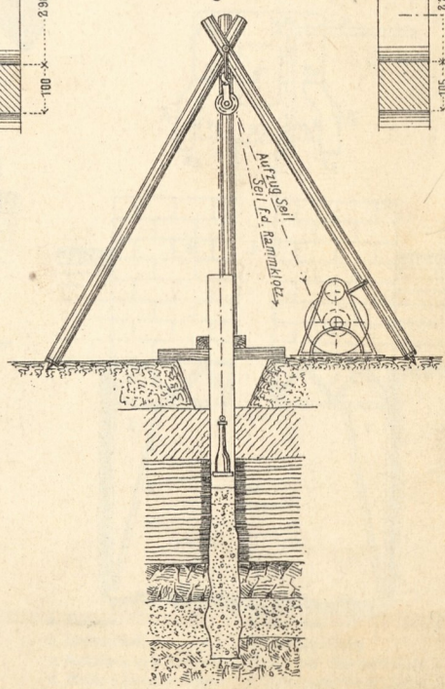


Mittl. Baugrund

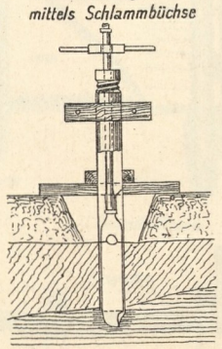
a. Grundriß.



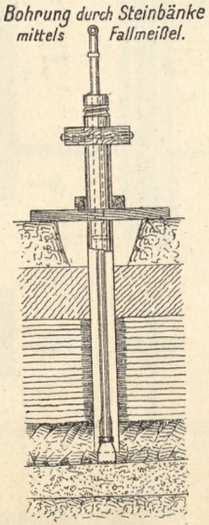
17. Stößelung des Betons.



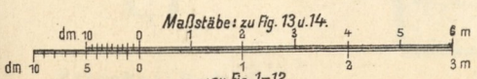
15. Bohrung mittels Schlammbüchse



16. Bohrung durch Steinbänke mittels Fallmeißel.



Maßstäbe: zu Fig. 13 u. 14.



zu Fig. 1–12.
