

Topping-out Ceremony at the Cybersecurity Campus Graz

The new Cybersecurity Campus Graz is currently being built on Campus Inffeldgasse. Construction is progressing well.

Philipp Jarke

In the Cybersecurity Campus, TU Graz will have its own internationally competitive location for its cutting-edge research focus on cyber security. The ultra-modern and climate-friendly research centre with a timber and glass façade is due to open in spring 2026. The total investment costs amount to around 25 million euros.

The campus, which consists of three buildings and a total of five storeys, will house the Institute for Information Security of TU Graz together with start-ups and companies from the cybersecurity sector.

Reorientation of the Institutes at the Faculty of Computer Science and Biomedical Engineering

The institutes at the Faculty of Computer Science and Biomedical Engineering were restructured at the beginning of the year. As a result, new and changed research focuses are now also reflected in the institute names.

Birgit Baustädter

The Institute of Algorithms and Theory, which deals with both classical and modern algorithm design as well as the basic principles of computer science, was newly established. The for-

mer Institutes of Computer Graphics and Vision and Computer Graphik und Wissensvisualisierungen were merged to form the new Institute of Visual Computing.

THE FOLLOWING INSTITUTES HAVE NEW NAMES

- **Institute of Information Security** (formerly Institute of Applied Information Processing and Communications)
- **Institute of Human-Centered Computing** (formerly Institute of Interactive Systems and Data Science)
- **Institute of Machine Learning and Neural Computing** (formerly Institute of Theoretical Computer Science)
- **Institute of Software Engineering and Artificial Intelligence** (formerly Institut für Softwaretechnologie)
- **Institute of Health Care Engineering** (formerly Institute of Health Care Engineering with European Testing Centre for Medical Devices)
- **Institute of Neural Engineering** (formerly Institut für Neurotechnologie)
- **Institute of Biomechanics** (formerly Institut für Biomechanik)
- **Institut of Biomedical Informatics** (formerly Institut für Biomedical Informatics)
